

AMENDMENTS TO THE DRAWINGS:

Please replace FIGS. 1-3 with the figures in the two Replacement Sheets attached to this paper. FIGS. 1-3 in the Replacement Sheet have been labeled as prior art as required by the Examiner. Office Action, page 2. No other changes have been made to these figures.

A new drawing labeled as FIG. 17 is also provided in the New Sheet attached to this paper. FIG. 17 schematically illustrates AC voltage from a public network being input into a computer power supply. FIG. 17 also illustrates the DC voltage output of the computer power supply being converted to AC voltage to drive the AC motor. FIG. 17 further illustrates an embodiment of the rotor with an angular position sensor, the stator, and the impeller of the AC motor. Support for FIG. 17 can be found between ln. 14, pg. 14 and ln. 8, pg. 15 of the English language translation of the International Application filed on May 5, 2006.
